

IEVGEN CHERNYSHENKO

FULL STACK DEVELOPER SUMMARY

I am rational, enthusiastic & likable with a real focus on how to get the best out of people and a proven reputation for matching creative initiatives to the commercial realities of the global marketplace. Based on my professional records I have been embroiled in front-end part of development on magic React and back-end on Node.js as well.

I faced some obstacles on my first steps of acquaintance with Redux but now I have feelings of the firm friendship with this library. I would like to improve my skills and knowledges being involved into interesting, dynamic project.

CONTACTS
